offering a team of highly trained and skilled electrical and automation specialists that are available to meet your wide range of needs.

EXPERTS IN THE ELECTRICAL PRODUCT BUSINESS

OTP has electrical and automation specialists on staff to support a complete line of industrial control and electrical products. As your go-to electrical supplier, we enable you to continue to reduce your vendor base while keeping the technical support you require.

OTP offers a wide range of electrical products from industry leaders including:

- AC/DC motors and drives
- Industrial control equipment and systems
- Power distribution equipment and systems
- Servo and stepper motors
- Sensors and cables
- Meters, I/O and HMI
- Enclosures
- Transformers
- PLC's
- Temperature and process controllers

We have a team of trained and highly skilled specialists that are available to meet your needs for a wide range of value-added services including:

- Increased energy efficiency
- Technology upgrades
- Factory repair on all parts we supply
- Replacement components
- Machine automation and information gathering
- Equipment monitoring technology
- Process improvement

THE OTP REPAIR PHILOSOPHY IS SIMPLE:

- We fix it right the first time—to factory specs or better.
- We fix it on time—we make our schedule fit yours.
- We fix it on budget—if we quote it, you can count on it.
- We look for the root cause—repairs are good, solutions are better.

Send us your next repair and discover how OTP Industrial Solutions is more than just another supplier.

AC MOTORS

OTP sells and supports AC motors from industry-leading motor manufacturers

One-third of the world's electricity consumption is used to run AC motors driving pumps, fans, compressors and machinery of all types. As energy costs continue to climb, it is more critical than ever to improve electric motor efficiency by using the best motor for each application. OTP can help you select the best motor for your application.

EISA federal law mandates motor efficiency

The Energy Independence and Security Act (EISA) was signed into law in 2007 to mandate motor efficiency. OTP can help you ensure EISA compliance.

As the specialists in electrical products and solutions, OTP has the answers you seek to enhance the performance of your industrial control, automation and electrical distribution.

MOTOR CONTROL

Reduce energy consumption, reduce installation and maintenance costs and minimize production downtime

Variable Frequency Drive adjusts a motor's speed to closely match output requirements, resulting in typical energy savings of 10 to 50 percent.

A Soft Starter controls acceleration and deceleration of 3-phase motors to lower the demands on a motor during start-up, conserve energy and extend the life of the mechanical system.

Shaft Power Monitor provides protection from damage and breakdown. Shaft Power Monitor warns or stops the process if a problem occurs.

Starters and contractors provide for a complete range of IEC Power Control needs and a wide range of applications with suitability for worldwide use.

ELECTRICAL CONTROL SYSTEM

As your full service distributor, we offer a full range of control-specific services:

- Component selection
- Panel assembly
- Design and build services for custom control panels
- System packaging and skid mounting
- Application engineering
- Remote monitoring and control
- System design and reengineering
- Equipment surveys
- Training seminars
- Repair for all brands of electrical components

COMBINE ELECTRICAL AND MECHANICAL SYSTEMS

Knowledge to tie together pump, mechanical, pneumatic and electrical applications

OTP Industrial Solutions offers support of pumps, motors, drives, soft starters, power monitors, gearboxes, couplings and beyond. OTP's expertise extends beyond just products—we have the ability to design, review and repair complete systems.

ONLINE TECHNICAL SUPPORT & EXPERTISE
